

My Intro to Python project

Your Name

Project Overview

- **Purpose:**
 - I built a program to take over the world
- **How:**
 - It is supposed to work by magic
- **Actual results**
 - It actually only takes over New Jersey

Implementation Details

- The overall structure of your program is either:
 - An algorithm
 - A loop
 - Linear (start \rightarrow finish)
- You use the following tools
 - Did you use a while loop? For loops? Classes? If statements? Lists? etc.

What I Learned

- Some examples about what you can talk about:
 - I learned about how syntax works
 - I found the following things surprising:
 - How hard or easy something was
 - I really liked this thing
 - I am really excited about this other thing

Future Work

- Whether or not you will actually continue the project, describe ways you could extend it

Conclusions

- In summary, you can talk about one of the following:
 - The overall thing you liked
 - The overall thing you learned
